

SUSTAINABLE TEXTILE BOOK ORGANIC COTTON & LINEN & BLENDS

MILL 2. GOTS ORGANIC COTTON AND BLENDS. POWERLOOM & PRINTED TO YOUR DESIGN

THE MILL

Our Mill is SA 8000 Certified. SA 8000 is an independent body that enforces a zero-tolerance policy towards child labour, forced labour and inhumane treatment. They certify that workers are paid a liveable wage and work regular hours. Turn around for milling is very short 5-7 days but not guaranteed.

FABRICS. Our fabrics are organic and Eco-friendly. The inks are 100% plant base, biodegradable and approved for babies by OEKO-TEX® Standard.

GLOBAL ORGANIC TEXTILES STANDARD.

To be certified organic, fabrics such as our organic cotton, must be grown and produced under stringent standards that relate to the use of synthetic fertilizers and pesticides. To be labelled organic, the fabric meets the international standards set for fibre production and processing by GOTS (Global Organic Textile Standard).

Clients have the option to either purchase fabric that is not printed and plain griegge fabric, or print to your own design, or have dyed through your own or our service. **The printing or dyeing service is done through STSC's Consultancy Service.**

These fabrics come either plain or printed – **ECO-PRINTING IS 100% WATERLESS DIGITAL PRINTING**

Our printer is designed to reduce waste in fabric, ink consumption and electricity making it an energy and material conscious printer. The printing is in-house and uses the innovative and eco-friendly NeoPigment™ digital printing technology created by Kornit. The revolutionary process uses zero water in the printing which includes no pre-treatments, washing or steaming. Aside from being water free, the integrated process eliminates the need for external or additional chemical pre-treatments. The inks are water-based NeoPigment™ and are 100% free of heavy metals, formaldehyde and Alkylphenol Ethoxylates (APE), making them non-hazardous, non-toxic and biodegradable

PRINT TO YOUR DESIGN CONSULTANCY. <https://www.sustainabletextiles.club/consulting>

To print your own design on the many of STSC fabrics the Steps to follow are:

Purchase the Consultancy Fee to set up and manage the print job is AUD\$340 – approx. EURO 194 / USD 218 / GBP 175

- STEPS – Request a Consultancy Contract and purchase the Print Consultancy via the [Consultancy page](#)
- Send Purchase Order with details of print job and fabric. 10 metre minimum.
- STSC to send Sample Books of printed fabrics by request. ****NOTE FABRICS IN BLUE IN SAMPLE BOOKS ONLY**
- Send high resolution TIFF files / Vector Files
- Finalise pricing, moq, specs, delivery, payment details, etc
- Deposit paid to STSC/Mill
- 3-5 metre print samples sent to Client
- Final payment is finalised along with courier fees and the fabric shipped by STSC. Read full FAQs and T&Cs.

MILL 4. TENCEL™ X REFIBRA™ Jersey

Fabric for regular t-shirt, babies wear, home wear, sport wear. Samples current being made.

1. Single jersey 100% Refibra™
 - a. GSM 150
 - b. GSM 180-190
2. Single Jersey with Refibra™ 95% Spandex™ 5%
 - a. GSM 180-200
 - b. GSM 200-210

MILL 13. TENCEL™ X REFIBRA™ Denim

The Refibra™ DENIM MILL: <https://www.sustainabletextiles.club/lenzing-refibra>

Our Refibra™ Denim uses virgin cotton that is BCI Cotton which certifies that the farmers offer fair working conditions and treatment through the Better for Cotton Initiative (BCI). This Mill's virgin cotton is 100% BCI. <http://bettercotton.org>

This Mill also recycles 100% of its own water in its finishing machines and promotes qualities with low water use in dyeing. They also offer hemp denim. Hemp is the fastest growing of all plants and help farmers avoid the use of herbicides to gain the organic certification and therefore better crop rotation. The Mill also sells post-consumer recycled denim from damaged jeans. They shred the jeans before spinning and dyeing back new yarns.

MOQs.

Prices start between \$USD 8-10/metre for 2000m usual MOQ. (Currently Approx \$AUD 11.65/m to \$AUD 14.56)

Lower MOQs are sold only if the fabric is available or in production. Prices will increase according to the MOQ. Send a [PO Form](#) to Request your MOQ so we can determine if available. <https://www.sustainabletextiles.club/order-form>

Additional environmental standards:

Virgin cottons have BCI Cotton certification. 72% of the Mill's water is recycled (company-wide), which is quite a unique status as there are very few Mills to have company-wide initiatives. Note. when using stretch they only use branded Spandex or Lycra that are higher qualities than non-trademarked stretch (eg in the above case of 12.5oz stretch this is branded Lycra™)

OTHER WEIGHTS. Additional weights available from 5oz to 18oz by request at a minimum of 2000 metres. 200gsm fabrics available for underwear, shirting, school polo and tunics, activewear and leggings.

Notes on Refibra sourcing of post-consumer waste cotton.

“We work with brands, garment manufacturers and fabric producers as partners that supply us cotton waste directly from the garment cutting tables. This production was done in line with our vision statement regarding recycling technologies in the cellulose fiber industry and to show our commitment. The post-consumer waste was supplied by a collecting and sorting company in Europe, and we only use material that couldn’t have been resold and also is the right material.” Learn more about [TENCEL X REFIBRA](https://www.sustainabletextiles.club/tencelrefibrainfo) <https://www.sustainabletextiles.club/tencelrefibrainfo>

<u>TENCEL™ X REFIBRA™ Denim - “DIMITRY”</u> 13oz = 440gsm. Non-stretch woven denim. Refibra 31% Recycled Cotton 31% BCI Cotton 38%	<u>TENCEL™ X REFIBRA™ Denim - “MARIA-N/FLAT”</u> 12.5oz stretch - 423gsm Stretch woven denim. Refibra 32% Recycled Cotton 32% BCI Cotton 34% Lycra 2% Note this 12.5oz stretch has a salt/pepper look of a vintage fabric. The same qualities are offered in light blue, deep blue and black.

MILL 6. HYBRID ECO-BLENDS – POWERLOOM. **NOTE this fabric is not available at present.**

ACCREDITATION. GOTS Certified, Global Recycled Standard. GOTS dyes and **Traceability Signature Software** for the organic cotton to trace the cotton for full transparency. STSC is enormously privileged to be working with this Mill whose Owner is a textile technologist who has been working in the textile industry for 13 years and is developing his own hybrid eco-blends to support the environment, growers and makers.

Organic cotton blended with one of the following:

1. 30% Banana with 70% organic cotton
2. 30% Aloe Vera with 70% organic cotton (samples to come)
3. Recycled & Organic Cotton Blends. 60% post-consumer waste and pre-consumer knitted garments cut waste and 40% virgin Organic Cotton.
4. KNITS of the above fabrics in final R&D phase.

STSC wholesale banana fibre textiles as both a hybrid eco-blend of 70% Organic Cotton blended with a choice of 30% banana fibre (or aloe vera fibre). These fabrics are made using Ringspun cotton which is smoother and longer yarn compared to open-end yarn. In addition, Ringspun yarn goes through a spinning process that softens and straightens each fiber. The end result of Ringspun is a more refined fibre. Lead time. 45 days *Cost does not include 5% Indian tax or freight.*

BANANA 30% & ORGANIC COTTON 70% GSM. 140gsm Plain weave. Width 57" / 144.78cm Price for MOQ 2000m. Prices will increase if smaller MOQs are available upon request. DYEING. To achieve colours that you require, they will need to be individually costs through quotes and will be dependent upon many variables including colour, density, pantone, moq, fabric, etc. To develop this to suit your requirements STSC will need to work through a Tech Pack with you. Cost for this Consultancy is separate and will depend on your requirements.

VISIT THE WEBSITE to learn more about dyeing <https://www.sustainabletextiles.club/eco-dyeing>

ECO PRINTING. Printing on fabric is developed via STSC and a Consulting Fee is charged approximately \$340 per design.

Visit the website PRICE LISTS link to Download other organic cotton fabrics made in India by our Mills.
