

STSC. LENZING ECO- TEXTILE DIGITAL PRINTING

DIGITAL PRINTING ON LENZING ECOVERO™ TENCEL™ and MODAL™

Our MILL in INDIA is SA 8000 Certified which is an independent body that enforces a zero-tolerance policy towards child labour, forced labour and inhumane treatment. They certify that workers are paid a liveable wage and work regular hours. Turn around for milling is very short 7-14 days but not guaranteed. These fabrics are organic and Eco-friendly. The inks are 100% plant base, biodegradable and approved for babies by OEKO-TEX® Standard.

Client have the option to either purchase plain griegge fabric or print to your own design, or have dyed through your own or our service. The printing or dyeing service is done through STSC's Consultancy Service

ECO-PRINTING IS 100% WATERLESS DIGITAL PRINTING.

Our printer is designed to reduce waste in fabric, ink consumption and electricity making it an energy and material conscious printer. The printing is in-house and uses the innovative and eco-friendly NeoPigment™ digital printing technology created by Kornit. The revolutionary process uses zero water in the printing which includes no pre-treatments, washing or steaming. Aside from being water free, the integrated process eliminates the need for external or additional chemical pre-treatments. The inks are water-based NeoPigment™ and are 100% free of heavy metals, formaldehyde and Alkylphenol Ethoxylates (APE), making them non-hazardous, non-toxic and biodegradable

PRINT TO YOUR DESIGN CONSULTANCY. <https://www.sustainabletextiles.club/consulting>

To print your own design on the many of STSC fabrics the Steps to follow are:

- Purchase the Consultancy Fee to set up and manage the print job is AUD\$340 – approx. EURO 194 / USD 218 / GBP 175
 - STEPS – Send a Job Order form so we can accurately formulate the Consultancy price according to your requirements, how many prints, etc.
 - Request a Consultancy Contract
 - Pay invoiced Consultancy fee ascertained after STSC sees your Job Order.
 - STSC refine the Purchase Order re details of print job and fabric. 10 metre minimum (20m MOQ if Plain fabric with no printing)
 - STSC to send samples of printed fabrics for you to see quality.
 - Send high resolution TIFF files / Vector Files
 - Finalise pricing, moq, specs, delivery, payment details, etc
 - 30-50% Deposit paid to STSC/Mill for printed fabric.
 - 3-5 metre print samples are sent to Client for approval or adjustment. Courier fees are additional.
 - STSC will charge an additional \$50/hour to make further adjustments and order a new Production sample from the Mill.
 - Once the client is satisfied, remaining payment is finalised along with courier fees and the fabric shipped by STSC.
- Read full FAQs and T&Cs.

LENZING ECOVERO™

Lenzing™ ECOVERO™ is the eco-responsible viscose fiber manufactured from certified renewable wood sources while using a strict process that achieves high environmental standards. The fiber has the certification of the EU Ecolabel label to the environmental excellence. Ecovero™ generates 50% lower emissions and less water use compared to a conventional viscose. (Higg MSI provided by the Sustainable Apparel Coalition). **NOTE. STSC can develop other weights but may require 6000-7000 metre MOQs. Most fabrics will take 2-8 weeks to create, depending on fabric specs & availability.**

SWING TAGS, PR & MARKETING

Lenzing will supply you with swing tags for your garments and high res logos and use any information on STSC for your own PR and marketing. We highly recommend that you make this prominent given the alternative non-trademarked fabrics with the names of tencel, modal, lyocell and viscose, these are most likely to be sourced from non-sustainable forests causing mass deforestation and some using endangered forests as closely documented by canopyplanet.org

In addition STSC have carefully chosen our Mills to be of the highest environmental and ethical standards who capture and recycle their water and don't use toxic chemicals plus AZO-free dyes so we can then taken Lenzing's yarn and produce beautiful sustainable fabrics.

Note. Prices quoted may vary due to currency changes and does not include Freight and relevant taxes.

NOTES. Standard Production Time: 30-60 days

GSM WEIGHTS. Weights may vary a degree of +/- 5%.

Lengths are offered per metre, and 1 Meter of Fabric equals 0.9144 Yards therefore 100 yards equals 91.44 Meters. Final fabric length has a +/- 20% variation margin.

PRICES ARE QUOTED IN AUSTRALIAN DOLLARS. Note. Prices quoted may vary due to currency changes and does not include Freight and in some cases 5% Indian Rupees tax. Prices are calculated per metre. 1 meter = 1.0936 yards = 39.37"
