- Tencel Patta Dobby – 12 colours. Sample is the Chocolate
- Tencel & Flax, Cotton Blend – 5 colours. Sample is cream.
- Tencel Slub – 7 colours. Pink sample.

## LENZING ECOVERO™

Lenzing™ ECOVERO™ is the eco-responsible viscose fiber manufactured from certified renewable wood sources while using a strict process that achieves high environmental standards. The fiber has the certification of the EU Ecolabel label to the environmental excellence. Ecovero™ generates 50% lower emissions and less water use compared to a conventional viscose. (Higg MSI provided by the Sustainable Apparel Coalition). **NOTE. STSC can develop other weights but may require 6000-7000 metre MOQs. Most fabrics will take 2-8 weeks to create, depending on fabric specs & availability.**

90 gsm is 60 denier count. In natural fabrics the higher the count (of spinning) the fabric is smoother, finer and lighter.

130 gsm is 30 denier count, & slightly coarser & heavier. Note It is reverse for polyester, higher the denier the coarser the yarn.

## **\*\*MILL 2. INDIA – See Sample Book by Mill #2**

**SAMPLE BOOKS. NOTE. ALL FABRICS IN THIS BOOK ARE INCLUDED IN THE MAIN SAMPLE BOOK and in the MILL 2's SAMPLE BOOK WHICH IS A COMPLETE BOOK THAT CANNOT BE PULLED APART.**

### **AHIMSA PEACE SILK – PRINTED IN INDIA**

The printing or dyeing service is done through STSC's Consultancy Service.

**Our MILL in INDIA** is SA 8000 Certified which is an independent body that enforce a zero-tolerance policy towards child labour, forced labour and inhumane treatment. They certify that workers are paid a liveable wage and work regular hours. Turn around for milling is very short 7-14 days but not guaranteed. These fabrics are organic and Eco-friendly. The inks are 100% plant base, biodegradable and approved for babies by OEKO-TEX® Standard.

#### **GLOBAL ORGANIC TEXTILES STANDARD.**

To be certified organic, fabrics such as our organic cotton, must be grown and produced under stringent standards that relate to the use of synthetic fertilizers and pesticides. To be labelled organic, the fabric meets the international standards set for fibre production and processing by GOTS (Global Organic Textile Standard).

Client have the option to either purchase plain griegie fabric or print to your own design, or have dyed through your own or our service. The printing or dyeing service is done through STSC's Consultancy Service

#### **ECO-PRINTING IS 100% WATERLESS DIGITAL PRINTING.**

Our printer is designed to reduce waste in fabric, ink consumption and electricity making it an energy and material conscious printer. The printing is in-house and uses the innovative and eco-friendly NeoPigment™ digital printing technology created by Kornit. The revolutionary process uses zero water in the printing which includes no pre-treatments, washing or steaming. Aside from being water free, the integrated process eliminates the need for external or additional chemical pre-treatments. The inks are water-based NeoPigment™ and are 100% free of heavy metals, formaldehyde and Alkylphenol Ethoxylates (APE), making them non-hazardous, non-toxic and biodegradable

#### **PRINT TO YOUR DESIGN CONSULTANCY.** <https://www.sustainabletextiles.club/consulting>

To print your own design on the many of STSC fabrics the Steps to follow are:

- Purchase the Consultancy Fee to set up and manage the print job is AUD\$340 – approx. EURO 194 / USD 218 / GBP 175
  - STEPS – Send a Job Order form so we can accurately formulate the Consultancy price according to your requirements, how many prints, etc.
  - Request a Consultancy Contract
  - Pay invoiced Consultancy fee ascertained after STSC sees your Job Order.
  - STSC refine the Purchase Order re details of print job and fabric. 10 metre minimum (20m MOQ if Plain fabric with no printing)
  - STSC to send samples of printed fabrics for you to see quality.
  - Send high resolution TIFF files / Vector Files
  - Finalise pricing, moq, specs, delivery, payment details, etc
  - 30-50% Deposit paid to STSC/Mill for printed fabric.
  - 3-5 metre print samples are sent to Client for approval or adjustment. Courier fees are additional.
  - STSC will charge an additional \$50/hour to make further adjustments and order a new Production sample from the Mill.
  - Once the client is satisfied, remaining payment is finalised along with courier fees and the fabric shipped by STSC.
- Read full FAQs and T&Cs.

**SAMPLES OPTIONS.** The 2x fabrics below in blue are included in

1. MILL 2. SAMPLE BOOK that can be purchased by itself
2. or within the MAIN SAMPLE BOOK
3. or separate by request.

## STSC ECO-COUTURE, LUXURY TEXTILES

STSC are proud to be working with eco-sericulture specialist to produce our Peace Silk, plus to have been selected by Lenzing Austria to be one of their exclusive wholesalers to sell their new luxury product TENCEL™ LUXE. STSC have worked carefully to create these supply chains and is offering a wide range of luxury fabrics, plus fabrics that are entirely new blends. Exclusive to STSC, we have created a unique range of Luxe and Peace Silk blends that are possibly the world's most sustainable and ethical luxury fabrics.

**SILK AND SILK BLENDS.** We source our silk from India where it is known as Ahimsa Silk, Peace Silk, Non-violent Silk or Cruelty free silk. Central to our belief system, we are opposed to “regular” silk where the silk worm is boiled alive and toxic chemicals are used to de-gum the cocoon, our suppliers have created a modern form of rural cooperation where it's important to them that they treat the silk worms, themselves, their community and their environment with utmost care.

By working as a co-op, the production is cleverly decentralized to allow the silk farmers, spinners, weavers etc. to work directly from their own areas. The different units of cocoons, yarns and ready textiles are then connected and stored at a centralized headquarters.

**THE PEOPLE.** The co-op follows a corporate social responsibility platform, where sustainable utilisation of manpower, ecology and natural resources work together. The living standards of the project members are higher, where the weavers have a comfortable lifestyle and their children are attending local schools. The women in the group are able to adapt their new professional skills allowing for social and economic self-dependency.

**THE ENVIRONMENT.** There are zero pesticides or genetic sprays used on the leaves or host mulberry trees feeding the worms which often creates a double crop. To create biodiversity, they have cultivated rice and potato along with the mulberry host trees. Ecologically, the entire region appears significantly greener than previous times.

During the silk farming stage, where they rear silkworms to produce silk, this occurs mainly in free nature and in some cases, indoors. To keep silkworms safe from harmful insects or birds, large mosquito netting is attached to protect each tree where the silkworms live and breed. In some cases, a Bio-Spray may be used.

**SERICULTURE / SILK FARMING.** Once the cocoons are ready, they are placed indoors on a bamboo platform. In case of Tussar silk, the cocoons are hung vertically from the ceiling using jute strings. In approximately one week, silk butterflies (moths) hatch out themselves or in some cases the cocoons need to be pierced by well-trained staff to assist the moth. Each cocoon is checked that its empty and is then forwarded to the degumming department. That is why the silk is known as Peace silk.

**PRODUCTION.** The process of eliminating “Gum (sericin)” and impurities from raw silk is known as degumming of silk. This is done by adding natural bio soap in the hot boiling water. Occasionally hydrogen peroxide is used to make different shades 3 of silk yarn uniform.

**CERTIFICATION by REACH & GOTS.** In commercial “regular” silk, toxic metals such as Chromium, Barium, Lead, Iron or Sodium magnesium are used during the degumming process of ‘silk- weighting’ to make silk yarns heavier. These chemicals are not used or permitted in our production.

Four out of our twenty power looms have been upgraded with solar powered motors. Spinning and reeling is processed either manually or with solar machines. This makes 70% of our spinning and weaving operation zero-carbon. Packing and storing of the product is mainly done with jute bags or reclaimed cardboards. Transport of cocoons or ready yarns to weavers in different areas is done by public transport state roadways or Indian railway. Water usage is minimised in our production process with reclaiming used water by filtering the old used water. Residue from cocoon degumming is used as compost for agriculture.

**FULL DETAILS.** <https://www.sustainabletextiles.club/peace-silk-textiles>

**IN-HOUSE DIGITAL PRINTING - GOTS certified Eco-friendly zero impact digital printing.**

We have 2 digital printing machines in our factory. Both are custom made printing system for peace organic silk. This German-Japanese combination is the best in sustainability. Inks are GOTS certified and of zero impact on nature and human skin. This system consumes very small amount of ink, electricity and water. Our printing floor is made with zero-waste facility. Waste water from printing is recycled/ reused for further use through in-house bio-ETP plant.

**TIMEFRAME.** Between 3 and 6 weeks. Ask prior to order. For dyeing and printing, after approval of lab dip, will be 3 to 4 weeks.

**MOQ 1 roll (45 to 49 meters).** Prices may differ also regarding width. Offer 114cm or 140cm widths. Price in Australia \$

**LOW-TOX DIGITAL PRINTING OPTIONS TO EITHER DO IN-HOUSE IN INDIA (Consultancy fee starts at aud\$300) or with our recommended printers in SYDNEY, LONDON AND SOON NEW YORK**

Printing on low/medium MOQs is possible and marked below in GREY and done in currently done in Sydney and London.

**KEY.** Fabrics in GREY are stocked by Think Positive in Sydney & London and can be ordered to print. Fabrics with \*\* are often in stock readily available therefore send an enquiry for 15 metre MOQs availability which will incur a cut fee.

## **MILL 5. AYURVASTRA AHMSA SILK / PEACE SILK.**

### **PRICE LIST # 4. AYURVASTRA HANDLOOM GOTS ORGANIC COTTON**

Griege or dyed with pure plant based dyes & imbued with Ayurveda medicinal plants and herbs.

We especially love our unique Ayurvastra handloom organic cotton fabric plus Ahimsa Silk (Peace Silk) that is hand dyed using pure plant-based dyes plus infused with Ayurvedic medicinal plants, carrying the 5,000 year-old Indian natural medical practice known as Ayurveda, which is a sister science to yoga and meditation.

This handloom society was set up 29 years ago to give women weavers a fair wage. These artisans take great care in collecting up to 1200 herbal plants from nearby herbal forest, the Augestya Forests Range to put into the yarn. STRIPED FABRIC is made using two or three different colour silks that are yarn dyed.

## TENCEL™ Luxe Swing Tag – Option 1

Front

## LENZING TENCEL™ LUXE PLUS ECO-COUTURE HYBRID BLENDS

Lenzing Austria have developed TENCEL™ LUXE yarn using the closed loop system to offer a true sustainable option for the premium luxury market to choose eco-couture fabrics. STSC will be producing 100% Tencel LUXE in February 2019 in India and Japan.

This new lyocell filament heralds a new era of sustainable high-end cellulose fabrics offering superior aesthetics, performance and comfort level that allow them to be the perfect partner with other fibres such as Lenzing's own Tencel lyocell, STSC's partner rural Indian co-op GOTS Organic Peace Silk (as above), plus cashmere, wool, linen, mohair.

STSC are currently offering the fabrics listed below plus we are working with Lenzing and our Peace Silk producers to develop exclusive fabrics using LUXE and Peace Silk; 1. jersey, 2. Interlock, 3. Knit, and 4. jacquard knits all in different weights.

**Full Details** both on the website and attached PDF document
