

STSC. LENZING ECO- TEXTILE BOOK

NOTE. CURRENCY RATE FOR **ALL TEXTILES** are 28/2/2020 THEREFORE RATES MAY CHANGE DUE TO CURRENCY FLUCTUATIONS
SAMPLE BOOKS. FABRICS LISTED HERE ARE FROM FOUR DIFFERENT MILLS. See details below regarding which fabrics are found in the various Sample Books. NOTE. SAMPLE BOOKS CANNOT BE PULLED APART.
BOOK an appointment at the Redfern studio or via Skype to see the collection.

STSC are fabric wholesalers who aim to inspire global fashion and product designers to use true sustainable eco-textiles that have minimal negative impact on the environment and maximum impact on the welfare of all people along the supply chain. STSC is proud to represent **LENZING™**, who make a range of world-renowned cellulosic eco-yarns that are the highest accredited made in a closed-loop system from wood pulp that is sourced from sustainable forests (mostly eucalyptus and birch) which hold Europe's highest sustainable certification.

Woven fabrics include 100% **Modal™**, **Modal™** and Linen blends, 100% **Tencel™** and **Tencel™ Denim** plus **Tencel™LUXE** (eco-couture for luxury brands) and blends. We also wholesale their newest and most environmentally sustainable and biodegradable yarns, **ECOVERO™** plus Jersey knits using 100% **ECOVERO™** and blends. Development for **Tencel™ ActiveWear**, bed Linen, and soon **REFIBRA™**.

As Lenzing produce the yarn, STSC have developed sustainable supply chains to create the finished eco-fabric. We have selected several commercial mills in India, Indonesia and Japan who use some of the most advanced production equipment including biological water waste and chemical treatment and conservation systems.

DYES. STSC also ensures that we only wholesale fabrics that use dyes that are non-AZO, OekoTex 100 Standard 100 or we can work with you to have it dyed with pure plant based dyed, or GOTS accredited low-toxic dyes. All Mills address our key concerns of water conservation, clean water preservation and minimal negative environmental impact in our supply chains.

STSC has also been selected by Lenzing as one of their exclusive wholesalers to sell their new luxury product **Tencel™LUXE**. We are also proud to be working with eco-sericulture specialists who are a rural co-op who produce our organic Peace Silk. We are in the process of creating a unique range of luxury fabrics exclusive to STSC, using Tencel Luxe and Peace Silk blends, which we believe will be the world's most sustainable and ethical eco-couture fabrics.

These beautiful, ethically sourced Peace Silks are made from cocoons where the silk worms live in an organic environment and have been supported to evacuate as moths naturally and were not boiled alive. Additionally this silk is degummed without using chemicals as is the method used in making traditional silk. STSC have worked carefully to create these supply chains and offers a wide range of fabrics, plus develop entirely new blends and gsm's.

HOW TO ORDER

- Prior to ordering please read the HOW TO ORDER details that you find from the HOW TO ORDER link at the top of each page on the website.
- **BOOK an appointment at the Redfern studio or via Skype to see the collection..**
- visit Consultancy to learn more about additional design, manufacturing, dyeing and eco-printing services
- Printed fabrics will be charged a Consultancy fee to coordinate.

ADDITIONAL COSTS VIA INVOICE.

- Indian Tax 2.5% (if sending within India). Orders below 100 metres at some Mills incur a cut fee eg \$30-\$80
- Price does not include international freight. Eg India to Australia is approx aud\$2 to 3.70/m (depends on fabric weight)
- Price does not include domestic shipping – depends on your location and fabric weight
- Postage & Handling fee aud\$10-20 depending on how many buyers and Mills involved.

Lenzing trademark fabrics comes with swing tags for Certification. Read full FAQs and T&Cs

PRICES ARE QUOTED IN AUSTRALIAN DOLLARS. Note. Prices quoted may vary due to currency changes.

LENZING CELLULOSIC FABRICS.

“Our story starts with Austrian company Lenzing AG, to explain how the combination of using natural fibres and contemporary technology is making fabrics that are not harmful to humans or the environment.”

STSC are proud to be affiliated with Lenzing and wholesale only trademarked Lenzing yarn that is then turned into fabric to STSC's specifics with our accredited manufacturer to meet higher than regular sustainable standards along our entire supply chain, from the forest to the fabric. Fabric labelled as viscose, Lyocell or even illegal untrademarked Tencel, are coming from potentially unknown and unsustainable chemically made sources without care for the water or forests' rejuvenation.

“This light and versatile material is a cellulosic fibre made by dissolving wood pulp, and it has exploded in popularity in recent years. As it is 50% more absorbent than cotton, its superior moisture-wicking and anti-bacterial properties make it ideal for use in activewear. Requiring less energy and water than cotton, Tencel is also biodegradable and according to Lenzing, sourced from sustainably managed eucalyptus plantations.

Although it does require petrochemicals in the production process, they are used in a closed-loop system meaning the same solvent is recycled time and time again to minimise harmful waste.”

<https://goodonyou.eco>

These cellulosic fabrics are biodegradable, uptake eco-dyes extremely well to save water, are breathable, long-lasting softness, hard wearing, versatile, and rate higher absorbency than other natural textiles. Lenzing grow and harvest from their own local, European accredited sustainable forests, then manufacture in a state-of-the-art closed loop system, this method produces yarn that satisfies 99% of the circular economy needs. STSC then take it to Mills in India, Indonesia and Japan to make true sustainable fabrics using sustainable manufacturing practices.

STSC sells Forest Based Fabrics (FSC Forest Stewardship Council certified <https://au.fsc.org/en-au>) made from eucalyptus and birch wood pulp sourced from sustainable forests grown in Austria and Bavaria, with the yarn being produced by Lenzing™ and the fabrics milled in India to STSC's specifications with carefully selected Mills who follow sustainable practices including AZO-free plus GOTS dyes and state of the art effluent biowaste systems.

SWING TAGS, PR & MARKETING

Lenzing will supply you with swing tags for your garments and high res logos and use any information on STSC for your own PR and marketing. We highly recommend that you make this prominent given the alternative non-trademarked fabrics with the names of tencel, modal, lyocell and viscose, these are most likely to be sourced from non-sustainable forests causing mass deforestation and some using endangered forests as closely documented by canopyplanet.org

In addition STSC have carefully chosen our Mills to be of the highest environmental and ethical standards who capture and recycle their water and don't use toxic chemicals plus AZO-free dyes so we can then taken Lenzing's yarn and produce beautiful sustainable fabrics.

COLOUR. Choose a colour from Pantone. Non-standard colours can take an extra 30 days to develop.

Colour retention. Colour pigments are deeply embedded into the fibres, which retain long-lasting colour vibrancy more than conventionally dyed fibres and are less prone to fade even after repeated washing.

WOVEN FABRICS. Lenzing™ yarn - Tencel™, 100% Tencel™ Denim and Denim blends, Tencel™ Luxe™, EcoVero™ AND Modal™ plus blends.

KNITS. Lenzing™ yarn - Tencel™, EcoVero™ and Modal™ and blends.

ECOVERO™ and TENCEL™ Lyocell fibers naturally manage the transportation of moisture, enhancing fabrics by keeping your skin feeling pleasantly comfortable. Composed of natural material, the microscopic fibrils of cellulosic fibres are structured to regulate the absorption and release of moisture. This contributes to breathable fabrics that support the body's natural temperature regulating properties, creating a refreshingly cooling sensation on your skin.

Full Details <https://www.sustainabletextiles.club/lenzing-eco-fibre-info>

LENZING ECOVERO™

Lenzing™ ECOVERO™ is the eco-responsible viscose fiber manufactured from certified renewable wood sources while using a strict process that achieves high environmental standards. The fiber has the certification of the EU Ecolabel label to the environmental excellence. Ecovero™ generates 50% lower emissions and less water use compared to a conventional viscose. (Higg MSI provided by the Sustainable Apparel Coalition). **NOTE. STSC can develop other weights but may require 6000-7000 metre MOQs. Most fabrics will take 2-8 weeks to create, depending on fabric specs & availability.**

**MILL #1. INDIA — See Sample Books by Mill #1. All fabrics are in stock

MILL #1 - SAMPLE BOOK – M1 includes the following. Colour swatches are limited so order the Samples to feel the fabrics but if you already know the feel & want to see the colour range then you can order by Request to see the entire book with the entire colour collection. We do not separate Books.

- EcoVero woven – 90gsm – Sample is white, Ready for Print or dye
- Tencel SATIN – 10 colours. Samples are Ivory White, Black & Coral (or purchase Sample Book on its own)
- Tencel Patta Dobby – 12 colours. Sample is the Chocolate
- Tencel & Flax, Cotton Blend – 5 colours. Sample is cream.
- Tencel Slub – 7 colours. Pink sample.

Some fabrics from Mill #1 we will do WATERLESS DIGITAL PRINTING USING WATER BASED NEOPIGMENT INKS

If printing the additional costs are:

- \$340 Print Consulting Fee
- Road freight from Mill 1 to Mill 2 printers – eg 100 metres or less by road is \$20 takes approx 4 days. Can quote on air.
- \$30 cut fee for fabric under 100 metres
- Shipping worldwide and direct

NOTE. CURRENCY RATE FOR ALL TEXTILES are 28/2/2020 THEREFORE RATES MAY CHANGE DUE TO CURRENCY FLUCTUATIONS
 LOW MOQs BELOW 100 METRES require a \$30 cut fee from this Mill.

90 gsm is 60 denier count. In natural fabrics the higher the count (of spinning) the fabric is smoother, finer and lighter.

130 gsm is 30 denier count, & slightly coarser & heavier. Note It is reverse for polyester, higher the denier the coarser the yarn.

****MILL 2. INDIA – See Sample Book by Mill #2**

SAMPLE BOOKS. NOTE. ALL FABRICS IN THIS BOOK ARE INCLUDED IN THE MAIN SAMPLE BOOK and in the MILL 2's SAMPLE BOOK WHICH IS A COMPLETE BOOK THAT CANNOT BE PULLED APART.

LENZING TENCEL™ and MODAL™

Our MILL in INDIA is SA 8000 Certified which is an independent body that enforces a zero-tolerance policy towards child labour, forced labour and inhumane treatment. They certify that workers are paid a liveable wage and work regular hours. Turn around for milling is very short 7-14 days but not guaranteed. These fabrics are organic and Eco-friendly. The inks are 100% plant base, biodegradable and approved for babies by OEKO-TEX® Standard.

GLOBAL ORGANIC TEXTILES STANDARD.

To be certified organic, fabrics such as our organic cotton, must be grown and produced under stringent standards that relate to the use of synthetic fertilizers and pesticides. To be labelled organic, the fabric meets the international standards set for fibre production and processing by GOTS (Global Organic Textile Standard).

Client have the option to either purchase plain griage fabric or print to your own design, or have dyed through your own or our service. The printing or dyeing service is done through STSC's Consultancy Service

ECO-PRINTING IS 100% WATERLESS DIGITAL PRINTING.

Our printer is designed to reduce waste in fabric, ink consumption and electricity making it an energy and material conscious printer. The printing is in-house and uses the innovative and eco-friendly NeoPigment™ digital printing technology created by Kornit. The revolutionary process uses zero water in the printing which includes no pre-treatments, washing or steaming. Aside from being water free, the integrated process eliminates the need for external or additional chemical pre-treatments. The inks are water-based NeoPigment™ and are 100% free of heavy metals, formaldehyde and Alkylphenol Ethoxylates (APE), making them non-hazardous, non-toxic and biodegradable

PRINT TO YOUR DESIGN CONSULTANCY. <https://www.sustainabletextiles.club/consulting>

To print your own design on the many of STSC fabrics the Steps to follow are:

- Purchase the Consultancy Fee to set up and manage the print job is AUD\$340 – approx. EURO 194 / USD 218 / GBP 175
 - STEPS – Send a Job Order form so we can accurately formulate the Consultancy price according to your requirements, how many prints, etc.
 - Request a Consultancy Contract
 - Pay invoiced Consultancy fee ascertained after STSC sees your Job Order.
 - STSC refine the Purchase Order re details of print job and fabric. 10 metre minimum (20m MOQ if Plain fabric with no printing)
 - STSC to send samples of printed fabrics for you to see quality.
 - Send high resolution TIFF files / Vector Files
 - Finalise pricing, moq, specs, delivery, payment details, etc
 - 30-50% Deposit paid to STSC/Mill for printed fabric.
 - 3-5 metre print samples are sent to Client for approval or adjustment. Courier fees are additional.
 - STSC will charge an additional \$50/hour to make further adjustments and order a new Production sample from the Mill.
 - Once the client is satisfied, remaining payment is finalised along with courier fees and the fabric shipped by STSC.
- Read full FAQs and T&Cs.

SAMPLE BOOKS. <https://www.sustainabletextiles.club/price-lists> Books sent 2-4 weeks depends on availability & your location.

LENZING REFIBRA™

IN THE PROCESS OF DEVELOPING REFIBRA JERSEY – PLEASE CONTACT TO EXPRESS YOUR INTEREST.

Refibra™ Lyocell is a fibre made from pulp that contains cotton scraps left over from cutting operations and wood. The fibre is produced in the TENCEL® production process. Therefore, Refibra™ combines both advantages, the recycling of cotton scraps and a sustainable fibre technology. The recycling of cotton waste into a new fibre reduces the need to extract additional raw materials from nature, lowers the impact on natural resources and offers a practical solution to promote circular economy. Excellent sweat-wicking microfibers from fabric that won't harm you or the environment.

MOQ. 300kgs. Approx 1200-1300 metres in any Colour

Tbc / Price per metre. Meterage by available colours

MOQ. <800-1200 metres

MOQ. <500 metres

PREMIUM QUALITY BED LINEN

- Softer, Smoother (500x thinner than cotton)
 - More Breathable (Hot sleepers will love us!)
 - More Moisture-Wicking (Absorbs 20x more sweat from skin)
 - Better for Sensitive Skin
 - More Durable (Resistant to tears and hold colour longer)
- Our Austrian Tencel™ sheets have almost **zero environmental impact:**
- No Pesticides or insecticides (Cotton uses ~16% of the world's insecticides)
 - 96% less water
 - 30% less energy

Note. Prices quoted may vary due to currency changes and does not include Freight and relevant taxes.

NOTES. Standard Production Time: 30-60 days

GSM WEIGHTS. Weights may vary a degree of +/- 5%.

Lengths are offered per metre, and 1 Meter of Fabric equals 0.9144 Yards therefore 100 yards equals 91.44 Meters. Final fabric length has a +/- 20% variation margin.

PRICES ARE QUOTED IN AUSTRALIAN DOLLARS. Note. Prices quoted may vary due to currency changes and does not include Freight and in some cases 5% Indian Rupees tax. Prices are calculated per metre. 1 meter = 1.0936 yards = 39.37"
